## ABOUT THE COLLEGE :

The College of Engineering Manthani (JNTUH CEM) is the constituent college of JNTU Hyderabad established in the year 2010, with six different branches viz. CSE, EEE, CE, ME, Mining Engineering and Mining Machinery. JNTUH CEM had been established with a mission to achieve multi-dimensional excellence in different fields of engineering and technology while adhering to the principles of curriculum. Also academic ambience in the institution holds the traditional and cultural values among the students.

## ABOUT SYMPOSIUM:

Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is the most important.

### - Bill Gates

In its endeavour to provide an international platform to the youth to showcase their talents and skill sets in fierce competitions, display cutting edge technology and research from all over the globe, have world renowned personalities motivate the youth and promote solutions to alleviate the common man of his banal yet significant problems, Aavishkruth strives for one and all to get inspired and look up to.

Aavishkruth has diversified into an organisation that apart from showcasing the pinnacle of technical advancement, also strives for the betterment of the society with unique initiatives. Be it a campaign focussed at promotion of futuristic and eco-friendly technologies or technical innovations aimed at eradicating problems faced by the common man, these initiatives to address social and environmental causes have set Aavishkruth apart from any other college festival and added a whole new dimension to this organisation working on a non-profit basis.

"Individuals reach the moon, teams reach out to the stars."

"Here's to the crazy ones, the misfits, the rebels, the troublemakers, the round pegs in the square holes ... the ones who see things differently -- they're not fond of rules, and they have no respect for the status quo. ... You can quote them, disagree with them, glorify or vilify them, but the only thing you can't do is ignore them because they change things. ... They push the human race forward, and while some may see them as the crazy ones, we see genius, because the people who are crazy enough to think that they can change the world, are the ones who do." -Steve jobs
